AMERICA'S FINEST 2 PASSENGER SIDECAR

With styling and performance unmatched by any other two seater sidecar in the industry, it's easy to see why the Daytona has become the flagship of the Champion family of sidecars. With reinforced double wall body construction and Champion's unique aerodynamic design, the Daytona sidecar will give you years of carefree touring enjoyment.

This elegant sidecar incorporates many of the same features you might find in a luxury automobile. The first thing you notice after sitting back in the Daytona is that it's like you were home watching TV in your favorite chair. Additional luxuries include fully carpeted interior with pull-out floor mat, flow through air venting system with directional dash mounted air ducts and a canopy design that allows easy entry and exit without removing the convertible top. Also incorporated into the canopy design is a push-button lock release switch located within easy reach. It allows your passenger to unlock the canopy without additional assistance.

We're sure the proven quality and rich design of the Daytona Sidecar will make you the envy of your friends and family.

We Bring Families Together

APPLICATION:
1000 CC
OR LARGER.

1-SEAT MODERN TOURING SIDECAR

The Escort Sidecar has been the first choice of serious sidecar enthusiasts for more than a decade. This premium sidecar provides its owner with the "Industry's Best" in styling, comfort and performance, yet it's priced to accommodate entry-level buyers.

Escort Sidecars feature a fully carpeted interior, an orthopedically designed bucket seat and five cubic feet of easily locked trunk space to protect your vacation treasures.

The Escort is the first sidecar to enter and then win its class in the grueling eleven day, eleven thousand mile Iron Butt Rally, demonstrating further the superior reliability and comfort of this industry leader.

650 CC AND
LARGER

The Original Award Winning Champion Sidecar

95 Harley Davidson
with Escort Painted
Two Tone

We saw a Champion Sidecar at a sidecar show and we knew we had to have one. It was love at first sight. Got your phone number and called you. Getting the same color as our Gold Wing motorcycle, made a beautiful match. Every place we go it gets lots of attention.

We are so happy we have the sidecar! Don't have to sit on the motorcycle back seat and look around Al's head to see where we are going. Have my own windshield. Plenty of foot room. Storage under the seat for purse and maps. Thank you very much for being so nice and doing such a great job on the sidecar.

Sincerely, Al & Marjorie Kinney

1-SEAT CLASSIC TOURING SIDECAR

The Legend's classic styling, combined with the latest technologies in sidecar manufacturing, makes this beautiful sidecar an excellent companion to any motorcycle, from a classic, restored Indian Chief to the newest cruiser style motorcycle. Every detail is well thought out, from the fully-carpeted interior to the custom-upholstered seat that hinges forward revealing five cubic feet of carpeted storage area.

If classic lines, superior handling and state-of-the-art engineering are what you are looking for in a sidecar, this is the right choice for you.

APPLICATION:
650 CC OR LARGER

Classic Styling

"I've enjoyed my Legend sidecar and have done many shows in Hawaii and Florida and have over 25 trophies! I won 14 1st Place and 4 Best-in-Show in the last 18 trophies. The sidecar speaks for itself."
Chuck "Gramps" Gugudan

SIDECAR ACCESSORIES

TILT

TRACKING INCREMENT LEANOUT TECHNOLOGY

With the push of your thumb you can control an electrically operated device located in the exterior wheel well of your sidecar, allowing you to make quick and easy trim adjustments that may be necessary to compensate for road crown or an increased weight within the sidecar.

The mechanism that activates the T.I.L.T. is a ball-bearing, waterproof actuator that requires the least amount of voltage and has the highest lifting range of any unit in its class.

In the photographs below, notice that when the position of the swing arm is lowered, the body of the sidecar in the left photo raises, leaning the motorcycle to the rider's left.
