

If necessity is the mother of invention, the drive for a better solution must be the father, because from those two elements Hot Toppers® were born. For twenty years in the motorcycle industry, my motorcycle had to be a show piece at all the different events I worked, and fasteners were a problem.

Chrome bolts rust. No matter how careful I was, even the top quality chrome bolts would disintegrate immediately upon arrival in Daytona, eventually elsewhere, and there is no warranty. Rusty chrome looks worse than zinc. I would rather be riding than tearing my bike apart replacing bolts.

Other solutions had other problems. Plug-ins only dealt with the face of the bolt – I could still see the sides of the zinc fastener and they never stayed on. Full covers cost more, but every Monday morning I still would have to replace the covers that fell off. No surprise that not one manufacturer would warranty those either.

Polished stainless bolts are expensive, require special care and polish, and do not have the strength of conventional bolts. Installation demands the costly labor of a tear down.

I wanted to spend my time riding, not tending to fasteners and I wanted my motorcycle to look good. I needed to develop a solution that was full cover, would not rust and would stay on the motorcycle. This quality product would have to work, because I was going to use it.

Time, energy and everything else that I owned went into the design and production of this solution. I am proud to use Hot Toppers® on my motorcycle, and am sure they will suit your riding needs. I stand behind my product. The chrome will last and they will stay on your bike, or I will replace them.

Bob Lundquist, President of Hot Toppers, Inc.

EVO® · TWIN CAM® · FLH/ROADKING®

HOT TOPPERS®

are made in the USA, chrome plated covers that friction
fit snugly over original Harley-Davidson® fasteners.
They can be placed on up to 250 places on your motorcycle

HOT TOPPERS ARE A REFLECTION OF THE ROAD

For a complete look, order

HTDFL7 2007-UP Twin Cam FLH/FLT, **HTDFL** 1999-2006
Twin Cam FLH/RoadKing®, **HTD80FL** 1984-1998 EVO® FL

The starter kit for the 1999-2006
Twin Cam FL is **HTD155**

The starter kit for the 2007-UP
Twin Cam FLH/FLT is **HTD156**

These HTD500 are used on the
exhaust support smooth torx bolts
shown above. Other spots include:
gas tank mounts, on sides of fork legs
and on frame above the saddlebag lids

Pictured above:

You can snap 4 HTD265 caps into the safety bar/rail mounts for finished look

SOFTAIL[®]

WHY BUY HOT TOPPERS[®]

Hot Toppers[®] improve your bike's appearance!
You can get chrome without the rust. Hot Toppers[®] enhance your cycle without the expensive labor to replace your original nuts and bolts. You won't have to buy expensive metal covers that will eventually corrode.

HOT TOPPERS ADD ATTITUDE TO YOUR RIDE

SOFTAIL™

Ninety percent of the Hot Toppers® are designed for a friction fit. But with some imagination and a drop of silicone, we can cover certain areas that need a Hot Topper® like the air cleaner to the left featuring a HTD355 or a smaller HTD365 shown on our cover Softail® and the Dyna® on page 20.

Snap 4 HTD265 over the stock screws on each side of the fork for a better look.

SOFTAIL®

For a simple, clean and affordable improvement for your choke knob we silicone a HTD265 in the center.

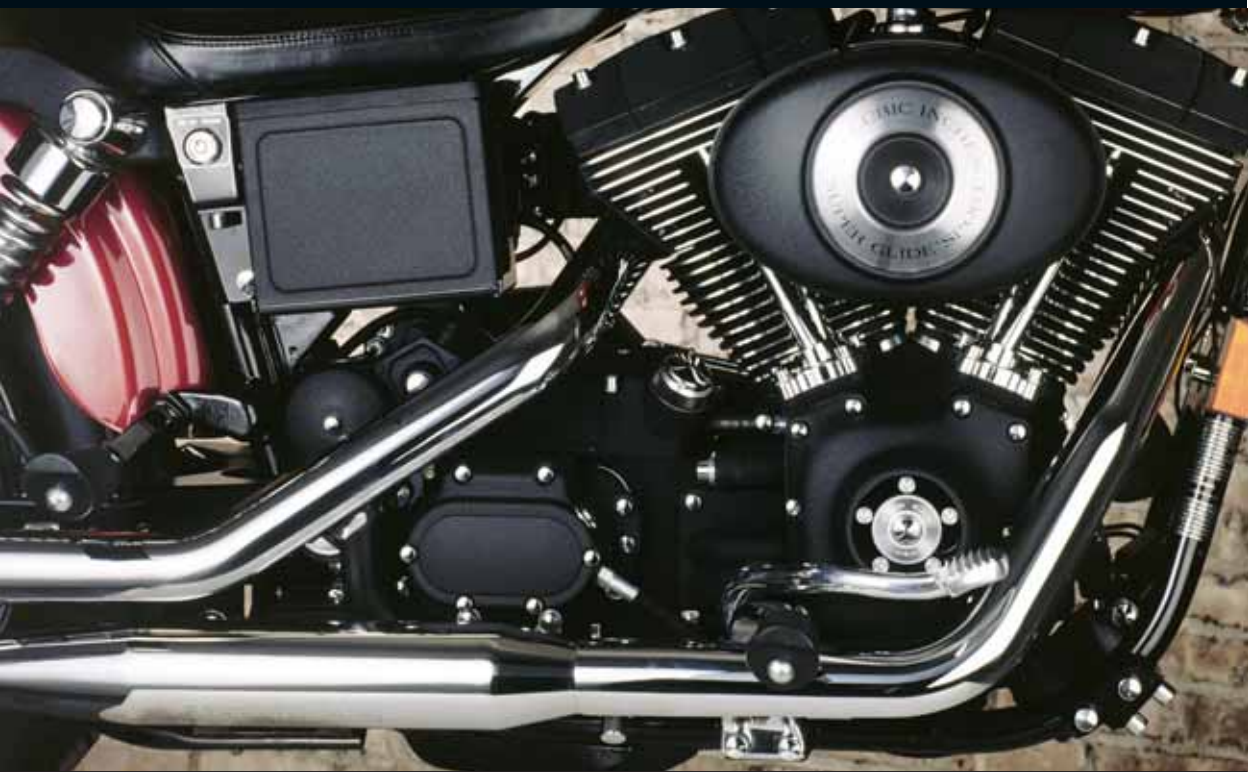

DYNA[®]

HOT TOPPERS[®] OFFER PROTECTION

for your original hardware from corrosion.
They make your bike easier to wash and wax.
No more rusty bolts!

A LITTLE CHROME PROTECTION FOR YOUR NUTS

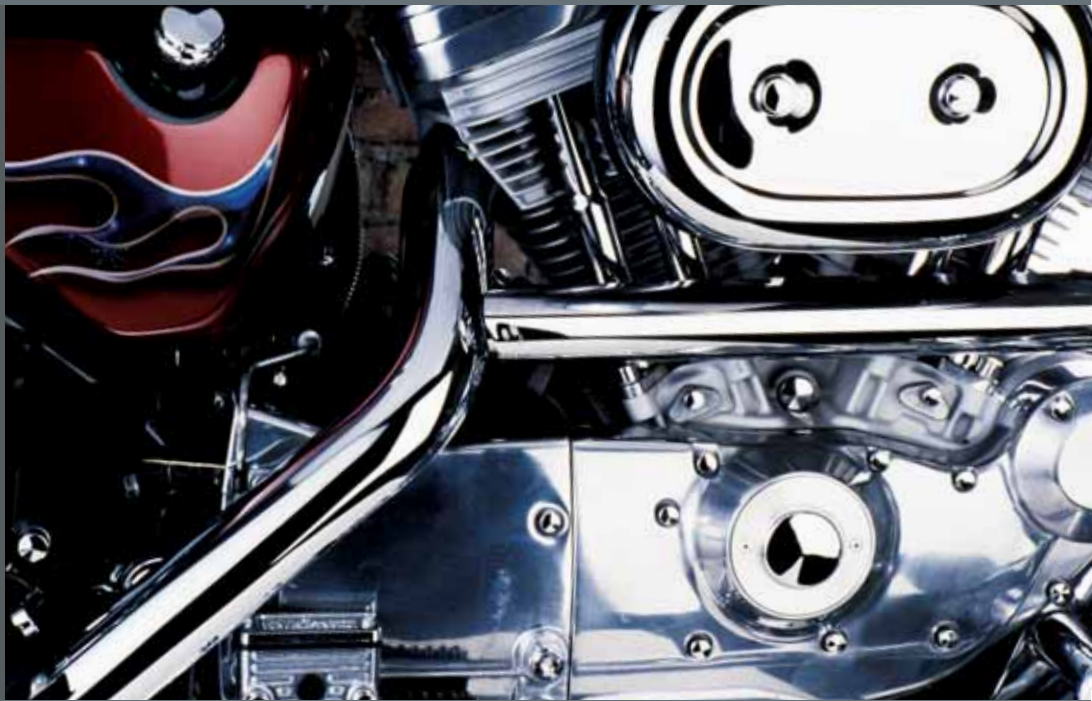

SPORTSTER®

HOT TOPPERS® ARE DURABLE!

Made in the USA of space-age ABS plastic which is copper based and triple chrome plated. This makes them resistant to scratches or chipping. The chrome plating will never rust or peel. Hot Toppers® are designed to stay on. Guaranteed! If you lose one, or if it discolors, peels, or chips, we will replace it!

FREE!
