### AVON OFFERS COBRA GL 1800 TIRE COMBINATION

**STOW, OH** – January 21, 2013 – Specially designed for the Honda Gold Wing 1800, the Cobra GL 1800 tires from Avon Motorcycle Tyres are the perfect choice for the rigorous demands of the powerful launches, fast acceleration, hard cornering and hard braking of this powerful bike.

When compared to the stock tires, the Cobra GL 1800 rear tire offers an increased load index of 80 to handle nearly 1,000 pounds. A triple compound, including a longer lasting compound in the center, softer shoulder compound for improved grip and cornering performance, and a third compound underneath, work together to reduce tire temperature and increase mileage. This six-ply tire includes two Aramid belts and a nylon belt to reinforce and stabilize the tire carcass, reduce tire flex under heavier loads, and provide a more comfortable ride. Force Following Grooves transmit energy across the surface of the tire for even wear and longer life.

"It's important to use a model-specific tire for the Honda Gold Wing 1800 because this bike places rigorous demands on the tires," stated Sukoshi Fahey, Sales & Marketing Manager, Avon Tyres. "This bike is fast and powerful. The Cobra GL 1800 tires have been developed with big, solid blocks of rubber to resist irregular wear, the elimination of the center groove for better handling in the wet and on irregular surfaces, and an increased load index for the rear tire."

The Cobra GL 1800 tires are available in size 130/70R18 (#90000001167) front, and size 180/60R16 (#90000001418) rear. Both include the popular Cobra snakeskin effect sidewall for the ultimate style. For more information about Avon Motorcycle Tyres, visit <http://www.avonmoto.com>

#### ***About Avon Motorcycle Tyres North America***

Avon Motorcycle Tyres North America, based in Stow, Ohio markets and sells Avon brand motorcycle tires in the United States and Canada. Avon motorcycle tires are designed and manufactured for street and racing applications, from ultra wide tires featuring snakeskin effect sidewalls to ultra high-performance sport bike tires. Avon's long history and heritage of innovation reaches back more than 100 years. Based in Melksham, England, Avon tires are built to perform and are engineered to high standards incorporating the latest in cutting-edge technology.
