

Over a decade ago I saw a need for a better way to deal with the original plain zinc fasteners used on stock Harley-Davidson® motorcycles.

Chrome bolts will eventually rust and polished stainless steel fasteners are expensive and require special care and polish to maintain their luster. Both choices require labor intensive bolt removal and replacement. Worst of all, not one manufacturer will warranty the fastener once it deteriorates. Unsolvable problem?

Welcome to the wonderful world of Hot Toppers®, the cost-effective solution for your hot rod.

Hot Toppers® are nut and bolt covers, made in the USA of durable space-age ABS plastic. They are copper

based and triple chrome plated. This makes them resistant to scratches or chipping. The chrome plating will never rust or peel. Our guarantee....if a Hot Topper discolours, peels or chips we will replace it free!

There are 23 different Hot Toppers® available in a variety of sizes and styles to cover the many different fasteners found on your car or American made motorcycle.

Hot Toppers® are reusable because they are designed to friction fit snugly, yet removable for maintenance. We use a small dental pick or knife to pry under just one side of the Hot Topper. If you scratch it, upon reinstallation, simply rotate the Hot Topper to hide the imperfection. The chrome will never peel or we will replace it.
